Scale: 40 MHz

How to use this chart

1) Print and laminate this page. For best results, choose "Do Not Resize" option in printer settings.
2) When flying with others, use a pen or dry-erase marker to assign initials of each person to one of the USED slots. Slots are based on Race Band frequencies with 37MHz spacing. Ideally, choose a band+channel closest to the corresponding center frequency and/or farthest from your nearest neighbor.
